

VOCABULARY WORDS TO CREATE YOUR CROSSWORD PUZZLE

(04 Jan 10)

Use the list below and select at least five words ACROSS and five words DOWN.

Create the Answer Key first – link the words you want to use in the pattern that works for you. You can do that on a plain piece of paper and remember to space the words out!

Then decide what clues you will use. The clues can be verbal, numeric, or combinations of both.

Lastly, create the blank puzzle grid on graph paper with your numbered clues underneath. Remember to number the blocks of your puzzle appropriately, just like a crossword puzzle in the newspaper.

Turn in your blank puzzle and clues along with your Answer Key for grade.
